

**Australian Government**  
**Australian Pesticides and  
Veterinary Medicines Authority**

**PERMIT TO ALLOW EMERGENCY USE OF A REGISTERED AGVET CHEMICAL  
PRODUCT FOR CONTROL OF MICE IN COTTON**

**PERMIT NUMBER – PER90579**

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

**THIS PERMIT IS IN FORCE FROM 27 JANUARY 2021 TO 30 JUNE 2021**

**Permit Holder:**

COTTON AUSTRALIA LTD  
Suite 4.01, 247 Coward Street  
MASCOT NSW 2020

**Persons who can use the product under this permit:**

Persons generally.

## CONDITIONS OF USE

### Products to be used:

MOUSEOFF ZINC PHOSPHIDE BAIT (APVMA No. 50532)

PLUS OTHER REGISTERED PRODUCTS

Containing: 25 g/kg ZINC PHOSPHIDE as the only active constituent.

### RESTRAINTS:

DO NOT apply bait to bare ground (including fallow where there is no vegetative cover).

DO NOT apply bait in a trail.

DO NOT apply bait if heavy rain is imminent.

DO NOT place baits in areas liable to flooding.

DO NOT apply to the outer 50 m of crop or within 50 m of native vegetation. A 50 m buffer zone in crop must be employed to reduce risks to birds and other non-target animals.

DO NOT apply bait unless monitoring of mouse numbers indicates the potential for crop damage of economic significance.

### Directions for Use:

Crop	Pest	Rate
Cotton (post emergent treatment only)	Mice	1 kg/ha

### Critical Use Comments:

- Apply by aerial application or accurately calibrated ground application equipment.
- DO NOT reapply for 14 days after application.
- When available, sterilised grain bait products should be used.

### Withholding Period:

DO NOT harvest crop or allow livestock to graze baited area for 14 days after application.

### Jurisdiction:

NSW, NT, QLD, VIC and WA only.

### Protection of Wildlife, Fish, Crustaceans, the Environment and Livestock:

Toxic to birds and other native wildlife. Bait should be distributed to minimise exposure to non-target wildlife, especially birds and livestock. It is preferable to place baits late in the day when birds have finished feeding. Particular care should be taken when baits are applied near native vegetation using aircraft as high bait concentrations may occur on the ground beneath aircraft that need to climb steeply. Spilt bait must be collected immediately, and applied according to label directions or buried below one metre. Any incidents where it is suspected that non-target animals may have been poisoned should be reported to state and territory authorities.

Very toxic to aquatic life. DO NOT contaminate wetlands or watercourses with this product or used containers.

### Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

Issued by the Australian Pesticides and Veterinary Medicines Authority.
